

# AWS Certified Cloud Practitioner (CLF-C02)

---

## Que 1

A startup is developing a mobile application that requires users to create accounts, sign in using Google or Apple, and securely access application features.

Which AWS service should the developers use?

- A. AWS IAM Identity Center
  - B. Amazon Cognito
  - C. AWS Organizations
  - D. AWS Directory Service
- 

## Que 2

A company wants to make sure that messages sent from one microservice to another are never lost, even if the receiving application is temporarily unavailable.

Which AWS service is the BEST choice?

- A. Amazon SNS
  - B. Amazon EventBridge
  - C. Amazon SQS
  - D. AWS Lambda
- 

## Que 3

According to the AWS Well-Architected Framework, which recommendation belongs to the **Security Pillar**?

- A. Use Auto Scaling to maintain performance.
- B. Encrypt sensitive data at rest and in transit.

- C. Reduce operational events by using automation.
  - D. Design loosely coupled architectures.
- 

## Que 4

A global company has employees working from offices in Asia, Europe, and North America.

The company wants employees to use the same IAM credentials regardless of which AWS Region they access.

Which statement is TRUE?

- A. IAM users must be created separately in every Region.
  - B. IAM users automatically replicate every 24 hours.
  - C. IAM is a global service.
  - D. IAM works only inside a single Region.
- 

## Que 5

A security team wants to receive notifications whenever the configuration of an EC2 security group changes.

Which AWS service should they use?

- A. Amazon Inspector
  - B. AWS Config
  - C. Amazon GuardDuty
  - D. AWS Trusted Advisor
- 

## Que 6

A development team has very little cloud experience.

They need a simple virtual private server with predictable monthly pricing.

Which AWS service is MOST appropriate?

- A. Amazon EC2
  - B. AWS Elastic Beanstalk
  - C. Amazon Lightsail
  - D. Amazon ECS
- 

## Que 7

A Cloud Engineer wants to deploy identical infrastructure across multiple AWS accounts using reusable templates.

Which AWS service should be used?

- A. AWS CodeDeploy
  - B. AWS CloudFormation
  - C. AWS Systems Manager
  - D. AWS Elastic Beanstalk
- 

## Que 8

Which TWO capabilities are provided by Amazon CloudWatch?

(Choose TWO.)

- A. Monitor application performance
  - B. Record API activity
  - C. Track resource utilization
  - D. Manage IAM users
  - E. Record AWS account billing information
- 

## Que 9

Which AWS service continuously analyzes AWS account activity to detect suspicious behavior and potential security threats?

- A. AWS WAF
  - B. Amazon Inspector
  - C. Amazon GuardDuty
  - D. AWS Shield
- 

## Que 10

A company wants to intentionally inject failures into its production environment to improve application resiliency.

Which AWS service should they use?

- A. Amazon Inspector
  - B. AWS Fault Injection Simulator
  - C. AWS Trusted Advisor
  - D. Amazon CloudWatch
- 

## Que 11

A large enterprise has hundreds of AWS accounts.

Employees should sign in once and seamlessly access all assigned AWS accounts.

Which AWS service should be implemented?

- A. AWS IAM
  - B. Amazon Cognito
  - C. AWS IAM Identity Center
  - D. AWS Organizations
- 

## Que 12

Which TWO features are provided by Amazon Route 53?

(Choose TWO.)

- A. Domain registration
  - B. Health checks
  - C. Network firewall
  - D. Load balancing
  - E. Storage acceleration
- 

## Que 13

Which TWO design principles belong to the **Operational Excellence Pillar** of the AWS Well-Architected Framework?

(Choose TWO.)

- A. Anticipate failure
  - B. Enable traceability
  - C. Make frequent, reversible changes
  - D. Automatically recover from failure
  - E. Reduce latency
- 

## Que 14

Which Amazon EC2 Auto Scaling capability directly improves application fault tolerance?

- A. Automatically replacing unhealthy instances
  - B. Increasing storage capacity
  - C. Encrypting EBS volumes
  - D. Creating snapshots
- 

## Que 15

Amazon EBS snapshots are primarily stored in which AWS service?

- A. Amazon EFS
  - B. Amazon S3
  - C. Amazon EC2
  - D. Amazon FSx
- 

## Que 16

According to the AWS Shared Responsibility Model, which task is the customer's responsibility when using Amazon EC2?

- A. Replacing failed hard drives
  - B. Securing AWS data centers
  - C. Configuring Security Groups
  - D. Managing the hypervisor
- 

## Que 17

A company wants to launch identical EC2 instances in another AWS Region.

Which AWS resource should they copy first?

- A. EBS Snapshot
  - B. Amazon Machine Image (AMI)
  - C. Security Group
  - D. Auto Scaling Group
- 

## Que 18

Which TWO are AWS Organizations best practices?

(Choose TWO.)

- A. Create AWS accounts for different departments
  - B. Disable CloudTrail in child accounts
  - C. Use Service Control Policies (SCPs)
  - D. Share the root user credentials
  - E. Disable IAM roles
- 

## Que 19

A software company wants to deploy applications without managing servers or operating systems.

Which cloud service model best fits this requirement?

- A. Infrastructure as a Service (IaaS)
  - B. Platform as a Service (PaaS)
  - C. Software as a Service (SaaS)
  - D. Hybrid Cloud
- 

## Que 20

Which statement best describes AWS Elastic Beanstalk?

- A. Infrastructure as Code service
  - B. Platform as a Service for deploying applications
  - C. Virtual machine service
  - D. Container orchestration service
- 

## Que 21

How are Amazon EC2 Windows On-Demand instances billed today?

- A. Per minute

- B. Per hour
  - C. Per second
  - D. Per day
- 

## Que 22

A company wants to continuously synchronize on-premises file systems with Amazon S3 while minimizing manual effort.

Which AWS service should they choose?

- A. AWS Snowball Edge
  - B. AWS DataSync
  - C. AWS Storage Gateway Tape Gateway
  - D. AWS Snowcone
- 

## Que 23

Which TWO factors affect Amazon EBS pricing?

(Choose TWO.)

- A. Provisioned IOPS
  - B. Instance type
  - C. Volume type
  - D. Data type
  - E. Availability Zone
- 

## Que 24

A company expects its EC2 requirements to change over the next three years but still wants Reserved Instance discounts.

Which purchasing option is MOST appropriate?

- A. On-Demand Instances
  - B. Spot Instances
  - C. Standard Reserved Instances
  - D. Convertible Reserved Instances
- 

## Que 25

Which statement about Amazon EBS volumes is **FALSE**?

- A. They are tied to a single Availability Zone.
  - B. They can outlive an EC2 instance.
  - C. They can simultaneously span multiple Availability Zones.
  - D. They provide persistent block storage.
- 

# AWS Certified Cloud Practitioner (CLF-C02)

## Mock Exam — Batch 2 (Ques 26–50)

---

## Que 26

A company hosts a web application behind Amazon CloudFront. The security team wants to block SQL injection and cross-site scripting (XSS) attacks before requests reach the application.

Which AWS service should be implemented?

- A. Amazon GuardDuty
- B. AWS WAF
- C. AWS Shield

D. Amazon Inspector

---

## Que 27

A company needs to establish a Site-to-Site VPN connection between its on-premises data center and an Amazon VPC.

Which component must exist on the customer side?

- A. Virtual Private Gateway (VGW)
  - B. Customer Gateway
  - C. Internet Gateway
  - D. NAT Gateway
- 

## Que 28

Which AWS service enables developers to add user authentication, authorization, and social identity providers such as Google and Facebook to applications?

- A. AWS IAM
  - B. AWS IAM Identity Center
  - C. Amazon Cognito
  - D. AWS Directory Service
- 

## Que 29

A company wants to centrally manage multiple AWS accounts, apply governance policies, and consolidate billing.

Which AWS service should they use?

- A. AWS Control Tower
- B. AWS Organizations

C. AWS IAM Identity Center

D. AWS Config

---

## Que 30

Which AWS service provides centralized governance by creating a secure multi-account landing zone using AWS best practices?

A. AWS Organizations

B. AWS Control Tower

C. AWS Config

D. AWS CloudFormation

---

## Que 31

Which TWO actions can be performed using Service Control Policies (SCPs)?

(Choose TWO.)

A. Limit the maximum permissions available to member accounts

B. Grant IAM permissions directly to users

C. Restrict which AWS services can be used

D. Replace IAM policies

E. Create IAM users automatically

---

## Que 32

A company wants to identify vulnerabilities in Amazon EC2 instances and container images.

Which AWS service should they use?

A. Amazon GuardDuty

- B. Amazon Inspector
  - C. AWS Config
  - D. AWS Shield
- 

## Que 33

A company wants to monitor API calls made within its AWS account for governance and auditing purposes.

Which AWS service should be used?

- A. Amazon CloudWatch
  - B. AWS Config
  - C. AWS CloudTrail
  - D. AWS Trusted Advisor
- 

## Que 34

Which event type is logged by AWS CloudTrail by default?

- A. Data Events
  - B. Insights Events
  - C. Management Events
  - D. Network Events
- 

## Que 35

A company wants to know **who** modified an Amazon S3 bucket policy yesterday.

Which AWS service provides this information?

- A. AWS Config

- B. Amazon CloudWatch
  - C. AWS CloudTrail
  - D. AWS Trusted Advisor
- 

## Que 36

A company wants to know **how** an EC2 security group configuration has changed over the last month.

Which AWS service should be used?

- A. AWS Config
  - B. AWS CloudTrail
  - C. Amazon Inspector
  - D. Amazon GuardDuty
- 

## Que 37

A company needs to archive regulatory documents for 15 years at the lowest possible storage cost.

Which Amazon S3 storage class should be selected?

- A. S3 Standard
  - B. S3 Intelligent-Tiering
  - C. S3 Glacier Flexible Retrieval
  - D. S3 Glacier Deep Archive
- 

## Que 38

A company has unpredictable access patterns for objects stored in Amazon S3 and wants AWS to automatically move data between access tiers.

Which storage class should be selected?

- A. S3 One Zone-IA
  - B. S3 Glacier Instant Retrieval
  - C. S3 Intelligent-Tiering
  - D. S3 Standard-IA
- 

## Que 39

Which AWS service provides an NFS file system that can be mounted simultaneously by thousands of EC2 instances?

- A. Amazon EBS
  - B. Amazon S3
  - C. Amazon EFS
  - D. Amazon FSx
- 

## Que 40

Which AWS storage service provides block storage for Amazon EC2 instances?

- A. Amazon EFS
  - B. Amazon EBS
  - C. Amazon S3
  - D. Amazon FSx for Lustre
- 

## Que 41

A company needs a durable object storage service for images, videos, backups, and data lakes.

Which AWS service should they use?

- A. Amazon EBS
  - B. Amazon S3
  - C. Amazon EFS
  - D. Amazon FSx
- 

## Que 42

Which AWS database service is specifically designed for graph databases?

- A. Amazon Aurora
  - B. Amazon Neptune
  - C. Amazon DynamoDB
  - D. Amazon DocumentDB
- 

## Que 43

An application experiences extremely high read traffic against Amazon DynamoDB.

Which AWS service can significantly reduce read latency?

- A. Amazon ElastiCache
  - B. Amazon CloudFront
  - C. DynamoDB Accelerator (DAX)
  - D. AWS Global Accelerator
- 

## Que 44

A company needs an interactive business intelligence service to build dashboards that executives can access from any device.

Which AWS service should be used?

- A. Amazon Athena
  - B. AWS Glue
  - C. Amazon QuickSight
  - D. Amazon EMR
- 

## Que 45

Which AWS service allows SQL queries to be run directly on data stored in Amazon S3 without provisioning servers?

- A. Amazon Redshift
  - B. Amazon Athena
  - C. Amazon RDS
  - D. Amazon EMR
- 

## Que 46

A company needs to prepare, catalog, and transform data before analytics.

Which AWS service should they choose?

- A. AWS Glue
  - B. Amazon Athena
  - C. Amazon QuickSight
  - D. Amazon EMR
- 

## Que 47

Which TWO AWS services are included under Compute Savings Plans?

(Choose TWO.)

- A. AWS Lambda
  - B. Amazon EC2
  - C. Amazon S3
  - D. AWS Fargate
  - E. Amazon RDS
- 

## Que 48

Which AWS support plan includes **Technical Account Manager (TAM)**?

- A. Basic
  - B. Developer
  - C. Business
  - D. Enterprise
- 

## Que 49

Which TWO features are available under the AWS Basic Support Plan?

(Choose TWO.)

- A. Technical Account Manager
  - B. Service Health Dashboard
  - C. Billing Support
  - D. Infrastructure Event Management
  - E. Concierge Support
-

## Que 50

A startup wants to improve its AWS architecture by answering a guided Quenaire based on the AWS Well-Architected Framework and receiving best-practice recommendations.

Which AWS service should they use?

- A. AWS Trusted Advisor
  - B. AWS Well-Architected Tool
  - C. AWS Systems Manager
  - D. AWS CloudFormation
- 

## Que 51

A company wants to improve the availability of its application by automatically distributing incoming traffic across multiple EC2 instances in different Availability Zones.

Which AWS service should the company use?

- A. Amazon Route 53
  - B. Elastic Load Balancing (ELB)
  - C. AWS Auto Scaling Plans
  - D. Amazon CloudFront
- 

## Que 52

A company wants to accelerate content delivery for users around the world while caching static files close to end users.

Which AWS service should they use?

- A. AWS Global Accelerator
- B. Amazon CloudFront
- C. Amazon S3 Transfer Acceleration

D. Amazon Route 53

---

## Que 53

A web application is experiencing a Distributed Denial of Service (DDoS) attack.

Which AWS service provides automatic protection for AWS resources against common DDoS attacks?

- A. AWS WAF
  - B. AWS Shield Standard
  - C. Amazon GuardDuty
  - D. Amazon Inspector
- 

## Que 54

A company wants to centrally store database passwords and automatically rotate them on a scheduled basis.

Which AWS service should be used?

- A. AWS Systems Manager Parameter Store
  - B. AWS Secrets Manager
  - C. AWS KMS
  - D. Amazon Cognito
- 

## Que 55

Which AWS service allows encryption keys to be created, managed, and audited?

- A. AWS Secrets Manager
- B. AWS CloudHSM

C. AWS KMS

D. AWS Certificate Manager

---

## Que 56

A company wants AWS to issue, manage, and automatically renew SSL/TLS certificates for an Application Load Balancer.

Which AWS service should be used?

A. AWS KMS

B. AWS Certificate Manager (ACM)

C. Amazon Cognito

D. AWS Shield

---

## Que 57

Which AWS service provides recommendations to improve cost optimization, fault tolerance, performance, security, and service quotas?

A. AWS Config

B. AWS Trusted Advisor

C. Amazon Inspector

D. AWS CloudTrail

---

## Que 58

A company wants to receive alerts when its monthly AWS spending exceeds a predefined threshold.

Which AWS service should be used?

A. AWS Cost Explorer

- B. AWS Budgets
  - C. AWS Pricing Calculator
  - D. AWS Organizations
- 

## Que 59

Which AWS service provides detailed historical reports and visualizations of AWS spending?

- A. AWS Cost Explorer
  - B. AWS Budgets
  - C. AWS Billing Dashboard
  - D. AWS Trusted Advisor
- 

## Que 60

A solutions architect wants to estimate the monthly cost of a new AWS architecture before deploying any resources.

Which AWS service should be used?

- A. AWS Pricing Calculator
  - B. AWS Cost Explorer
  - C. AWS Budgets
  - D. AWS Billing Conductor
- 

## Que 61

A company needs compute capacity immediately but can tolerate interruptions if AWS requires the capacity back.

Which EC2 purchasing option provides the lowest cost?

- A. Reserved Instances
  - B. Savings Plans
  - C. Spot Instances
  - D. Dedicated Hosts
- 

## Que 62

A company has a steady-state workload that will remain unchanged for three years.

Which purchasing option provides the greatest discount?

- A. Spot Instances
  - B. Standard Reserved Instances
  - C. On-Demand Instances
  - D. Dedicated Instances
- 

## Que 63

Which AWS service enables serverless execution of code without provisioning or managing servers?

- A. AWS Fargate
  - B. AWS Lambda
  - C. Amazon EC2
  - D. AWS Batch
- 

## Que 64

Which AWS service allows containers to run without managing EC2 instances?

- A. Amazon ECS on EC2

- B. AWS Fargate
  - C. Amazon EKS Managed Nodes
  - D. AWS Batch
- 

## Que 65

A company wants to deploy Docker containers while maintaining full control over the worker nodes.

Which AWS service best meets this requirement?

- A. AWS Fargate
  - B. Amazon ECS using EC2 launch type
  - C. AWS Lambda
  - D. AWS Elastic Beanstalk
- 

## Que 66

Which AWS service provides a fully managed Kubernetes control plane?

- A. Amazon ECS
  - B. Amazon EKS
  - C. AWS Fargate
  - D. AWS Batch
- 

## Que 67

Which AWS service helps migrate relational databases to AWS with minimal downtime?

- A. AWS Glue
- B. AWS DataSync

C. AWS Database Migration Service (AWS DMS)

D. Amazon EMR

---

## Que 68

A company wants to discover, classify, and protect sensitive data stored in Amazon S3.

Which AWS service should be used?

A. Amazon GuardDuty

B. Amazon Macie

C. Amazon Inspector

D. AWS Shield

---

## Que 69

Which AWS service continuously evaluates AWS resources against compliance rules?

A. AWS Config

B. AWS CloudTrail

C. Amazon Inspector

D. Amazon GuardDuty

---

## Que 70

Which AWS service allows secure private connectivity from a VPC to supported AWS services without traversing the public internet?

A. Internet Gateway

B. NAT Gateway

C. VPC Endpoint

D. Virtual Private Gateway

---

## Que 71

A company wants private communication between two VPCs within the same AWS Region.

Which service should they use?

- A. VPC Peering
  - B. Site-to-Site VPN
  - C. AWS Direct Connect
  - D. Transit Gateway Attachment
- 

## Que 72

Which AWS service provides a dedicated private network connection from an on-premises data center to AWS?

- A. Site-to-Site VPN
  - B. AWS Direct Connect
  - C. Internet Gateway
  - D. AWS Global Accelerator
- 

## Que 73

Which AWS service automatically improves application performance by caching frequently accessed data in memory?

- A. Amazon ElastiCache
- B. Amazon SQS
- C. Amazon SNS

D. Amazon EventBridge

---

## Que 74

A company needs to publish one message that must immediately notify multiple subscribers simultaneously.

Which AWS service is the BEST fit?

A. Amazon SQS

B. Amazon SNS

C. Amazon MQ

D. Amazon EventBridge

---

## Que 75

A company wants to automate infrastructure deployment using version-controlled templates.

Which AWS service should be used?

A. AWS Elastic Beanstalk

B. AWS CloudFormation

C. AWS Systems Manager

D. AWS OpsWorks

---
